

Getting Started For New Students

Compute Facilities:

The college offers High-performance computing clusters to aid students in their research work. This is accessible only over the IIIT network and varies from lab to lab. Contact your research lab for further details on this.

Connect to the IIIT Network via the Internet (From Outside The Campus):

Some internal sites are only accessible in IIIT Network, which means you cannot access them from the Internet. To connect to the IIIT Network you need to download the OpenVPN Config and install OpenVPN client to connect to the IIIT Network. More details on how to do this will be explained in detail [over here](#).

Authentication:

- LAN Authentication: https://self-help.iiit.ac.in/wiki/index.php/Wired_Network
- Wifi Authentication: https://self-help.iiit.ac.in/wiki/index.php/Wifi_Network
- CAS: We use CAS for most of the Applications to authorize. You need to use your LDAP password in CAS.

Accessing Moodle:

We use Moodle as LMS. You can access it by heading [over here](#) and simply logging-in with CAS.

Accessing Mail, Teams, and OneDrive:

We use the Office365 suite for Mail and other services. You can access all Microsoft Services including Mail, OneDrive, and Teams by heading [over here](#) and simply logging-in with CAS.

Accessing the Internet when on campus:

- You can use either the WiFi or the LAN to connect to the IIIT Network. Check the authentication section on how to authenticate.
- Configuring proxy isn't mandatory but recommended. [Go here](#) (note this should be done only when on campus) and check how to configure a proxy in different browsers.

Installation and Accessing MATLAB: [Go here](#)

Seek Help (IT):

- Visit [Help](#) to raise an issue ticket.

Seek Help (Academic):

- Please email with your roll number and your course name to:
 - help.academics@lists.iiit.ac.in
